Griffing Nurseries

WINTER 1940

WHOLESALE PRICE LIST

Standardized Graded
NURSERY STOCK
ADAPTED TO THE SOUTH

55th Year

YOU'VE A STANDING INVITATION

COME TO SEE US

A CORDIAL INVITATION is extended to you to visit our Nurseries. Come any time.

It is our firm conviction that visits to our Nurseries are worth many times your expense, which we will share with you if your business warrants.

Our organization takes a keen delight in showing our visitors through our 200 acres of Evergreens, Trees and Shrubs. If you are experienced in plant culture, you will enjoy seeing the splendid assortment of Trees, Shrubs, Fruits, etc., in our Nurseries, while an amateur will learn something of horticulture in an interesting and pleasurable way.

HOW TO REACH US

The illustration shows how to reach us. Convenient connections via rail and bus from every point, as well as principal highways.

OUR DISPLAY GROUNDS

For the convenience of our friends and customers who are unable to visit our Nurseries at Beaumont and in order to render a better service to our customers, we have established and maintain Arboretums in Houston and Corpus Christi, Texas.

Growing in these display grounds, you will see a wide variety of Trees and Shrubs attractively arranged and marked with Common and Botanical names. You are invited to visit these displays and you will find the persons in charge glad to show you over the grounds. Your orders may be booked at either of these offices or forwarded direct to our Beaumont office. In either instance, they will receive our personal attention.

GRIFFING NURSERIES

Address all correspondence to

BEAUMONT, TEXAS

DO YOU KNOW US?

With a love of gardening instilled by sturdy Welsh parents, rich in old world lore, the Griffings have for more than half a century devoted their energies to seeking out new varieties, improving old favorites, and distributing among their ever widening circle of customers and friends plants that add to the beauty and livableness of the South Home.

The name GRIFFING needs no introduction as it has been associated with Quality Nursery Stock for more than fifty years in the south. To the Trade as well as the Public, Griffing Nurseries Stock is known to mean the best quality obtainable produced under the most favorable condition. It is with this same emblem of Quality that we aim to serve our customers both old and new.

WALTER C. GRIFFING

RALPH C. GRIFFING

Personal attention will be given your requirements any time.
WE INVITE YOU TO VISIT US.

WE GROW OUR OWN STOCK

We are not jobbers or brokers. We grow all of the Nursery Stock offered in this catalog at our nurseries, located near Beaumont, Texas, except Roses and a few Fruit Trees, which are grown under contract and our supervision.

The growing of Nursery Stock is a highly specialized business requiring an exact knowledge of plants and horticultural and scientific methods. After 50 years of successful growing, we can without boasting claim to be experts in our line.

Through costly experiments, we have been able to determine the most hardy and suitable varieties for the Southwestern territory, and on these varieties, we have concentrated our main efforts so that our large 200-acre Nursery may yield an abundance of these plants to meet the ever-increasing demand.

Airplane view of our more than 200-acre Nursery, growing thousands of fine Evergreens; located on the largest irrigation canal in the world, employing 50 to 100 men regularly.

ASSOCIATION MEMBERSHIP: To further the interest of the Nursery and Landscape Development, and keep posted on affairs of interest to the Trade, we maintain membership in the following Trade Associations:

American Association of Nurserymen

Landscape Nurserymen's Association of the American Association of Nurserymen

Beaumont Florists & Nurserymen's Club

Beaumont Chamber of Commerce

Beaumont Young Men's Business League

Houston Landscape Nurserymen's Association

Louisiana State Horticultural Association, Inc.

Society of American Florists and Ornamental Horticulturists

Texas Association of Nurserymen

Texas State Florists' Association

Texas Horticultural Society

B&B—THE GRIFFING WAY

WHAT IS B&B? Moving a tree with the roots in the soil in which it grew.

WHAT IS NB? A Tree or Shrub dug with naked roots (Not Balled), puddled and packed in wet packing material.

No Roots Exposed to the Air.

The Dirt Can't Break Away From the Roots.

OUR BEAUMONT BALLING SOIL. Our great success in transplanting Trees and Shrubs safely at all seasons of the year may be largely attributed to our wonderful Balling Soil. There is no other just like it. We have the soil that is just right for balling and burlapping. The ball is spaded out of the ground in one solid piece, often compared to slicing a piece of cheese.

Our particular soil is known among Oil Company Geologists as "BEAUMONT LOAM" peculiar only to this section. It is rich and black, and when taken up in the form of a Ball, it will not crack or crumble; nor does it dissolve or melt down when set in water for weeks. On the contrary, this is the way to preserve the life of the Trees.

THERE IS A DIFFERENCE

PLANTS GROWN ON
IRRIGATED LAND
LOSE 5% OF ROOTS

PLANTS GROWN ON
NON-IRRIGATED LAND
LOSE 40% OF ROOTS

FLOOD IRRIGATION

Irrigation is one of the facilities we appreciate most in the production of Quality Nursery Stock. Fresh River Water is available for flood irrigation at any time of the year. In this way, our plants never suffer for water and a compact root system is developed. Roots do not have to seek moisture for long distances. The illustrations show the value of our B&B plants and it is no wonder Griffing Grown Trees and Shrubs live and grow.

ROOT PRUNING and transplanting into Good Balling soil are necessary, and frequent pruning to make low branched and well filled-in Specimens.

GRIFFING and QUALITY

QUALITY NURSERY STOCK AND THE NAME "GRIFFING" have been associated together for over fifty years. To the Trade, as well as the public, GRIFFING'S TREES are known to mean the Best Quality, produced under the most adaptable conditions. It is with this same emblem of Quality that we aim to serve our old and new patrons.

The Highest Quality does not mean the Highest price—instead it is always the Cheapest. Our Nursery stock is a product you are proud to handle—it lives, it satisfies, and gives results. It comes from a Firm with a record of long tested values of Quality Production.

The Thousands of Customers using Griffing Quality products make it profitable for us to carry on. Their patronage is appreciated, and their satisfaction is expressed in such testimonials as:

"100 per cent of our Plantings Lived and Grew."

"100 per cent of our Customers are satisfied when Griffing Trees and Shrubbery are used."

"100 per cent Profit is made on our orders where Griffing's Shrubbery is used."

STANDARDIZED GRADING

In 1923, the American Association of Nurserymen adopted a Standardized System for Grading Nursery Stock, using the symbol of X's to indicate QUALITY and dividing the various classes of Evergreens into Grade Groups. In our judgment, this is the only way to honestly grade and sell Nursery Stock.

When you visit our Nurseries, we will be glad to show you what is meant by Standardized Grading, and when you order, if you will specify the Quality you want, we will make your selection accordingly. We give the following illustration to show what is meant by Grading by X's—all plants are the same height, but there is a great difference in the general appearance and value.

XXX

XX

X

Griffing's Waxleaf Ligustrum illustrating Quality of plants.
Wouldn't you prefer the XXX?

Throughout this list, you will find the schedule of prices are according to X's.

XXX indicates strictly heavy, low branched, choice Trees or Shrubs.

XX indicates well developed, medium branched, good merchantable Trees or Shrubs.

X indicates poor quality, measured by height. All Nursery rows have some.

SPECIMEN STOCK above XX and XXX selected or marked in the Nurseries will be priced according to its value.

You Get What You Buy

THE GRIFFING SQUARE DEAL — Use Standardized Grading System so those who come to the Nursery and those who do not come, get exact Quality of merchandise as they specify. If you come to the Nursery, you will see the different Quality, but those who don't come, can rely on the Quality being given them as they designate in ordering. (We do not approve of the old fashioned way of letting the Professional Buyers select the choice of the stock early in the Season at current prices and force the ones buying later to pay the same price for the culls.) The System of Quality gives the purchasers a fair opportunity to buy, and a Standard to order by without personally selecting his material to get a "Square Deal."

BALL WEIGHTS

We have been often asked about a method of calculation of weights on Balled and Burlapped Trees and Shrubs and, in order to know exactly how much various size balls weigh, we made an experiment which is based on the heavy type soil we have. The weight of other soils will probably vary, depending on the texture and amount of moisture. By using the following formula we can calculate the weight of any size ball.

Easy Way to Find Out the Weight of a Balled and Burlapped
Tree or Shrub

SIZE OF BALL

When you order and we start to dig a Tree or Shrub, ordinarily we know about the class of soil it has been growing in, and we can estimate about the spread of the root system, and also about the tap root that should be left on the plant.

MEASUREMENT OF BALL

After we have decided the size of the root system, based on the size of the tree or shrub, we can estimate what size the ball should be. After we have decided on the diameter and depth of the ball, we can then determine the number of cubic inches in the ball.

MEASUREMENT OF BALL BY CUBIC INCHES

To figure the number of cubic inches in a ball, square the diameter; for instance, a ball is 12 inches wide each way, this would make 144 square inches. And, if it is 12 inches deep, this would make 1,728 cubic inches. In order to arrive at the weight of the ball, as compared with the cube, to allow for rounding off the corners, and for the top, deduct one-third ($\frac{1}{3}$) of the volume of cubic inches. Then to arrive at the weight, multiply by .075 pounds, which is the weight of a cubic inch of soil, and which gives the approximate weight of a ball, which as example on the 12"x12"x12" ball would be 87 pounds.

Note: If you want to find out what the weight of a certain shipment is, send us a list and we will approximate the weights according to the season of the year and the type of soil the plants are growing in, and give you the approximate weight of the shipment, according to the above schedule.

BUILD BUSINESS BY YEAR ROUND PLANTING

Many Nurserymen will refuse to transplant Trees and Shrubs during the late Spring and Summer months. Due to the fact that we have a particular kind of soil especially adapted for Balling Trees and Shrubs and our methods of Root Pruning, we are able to move Trees and Shrubs, at any season of the year without the loss of small branches or even leaves. Our experience has taught us that by the use of our Trees and Shrubs, plantings can be done in the Summer as well or even better than during the Fall and Winter.

TERMS OF SALE

NEW REDUCED PRICES

This list supersedes and cancels all outstanding wholesale quotations. Prices are subject to change without notice.

SAVE MONEY

BY TAKING ADVANTAGE OF 5% CASH DISCOUNT

TERMS: Cash. All accounts are payable at Beaumont, Texas. 5 per cent discount for cash with order. Where credit is established, 2 per cent for payment within ten days, net 30 days.

10% Car Load Discount

In order to supply Freshly Dug stock according to Standardized Grading, and fill the requirements of each individual Customer, it is necessary to select and dig the Trees from the large fields for each order. For carload orders, where more men are worked economically and the stock hauled direct to the Cars for loading, they can be handled cheaper per plant than on small orders.

PACKING CHARGES: All prices in this list are f. o. b. shipping point. No charge will be made for packing small bare rooted (NB) stock or bulk car lot and truck load shipments. Packing will be charged extra at cost on tubbed specimens and balled and burlapped plants and large bare rooted plants.

CLAIMS: Any claims must be made upon receipt of shipment or within five days. Complaints properly presented will be given special attention. Be sure to have exception for damages noted on transportation receipt at time of delivery.

NO DEALERS NO PEDDLERS NO SALES YARDS

We have no Dealers or Peddlers or sales yards. All stock is freshly dug and sent direct to customers, and no one is authorized to use our name without having our Agent's Credential and sell our stock exclusively.

GUARANTEE: We guarantee our stock to be well grown, true to name, properly packed and shipped according to instructions. In no case shall our liability be more than the original invoice value. Reserve orders are accepted upon the condition that they shall be void should injury befall the stock or error in count before shipment from any cause not under our control.

CONSIGNMENT: No stock will be sold directly or indirectly on consignment.

NOTICE: If you do not find the stock you want listed, please write us and we may be able to supply you. We have many varieties in insufficient quantities to warrant listing. We invite correspondence and are ready to assist our patrons in every way we can.

RESERVE ORDERS: On large orders for Stock to be shipped at intervals, we require a 25 per cent advance payment; or if booked and not reserved by cash payment, we are not responsible for any variety or size being on hand when stock is ordered shipped.

REPLACE one half PRICE

GRIFFING'S INSURANCE: Through our protection in handling B&B Nursery stock, we are willing to Insure or Guarantee our Trees to grow, provided our instructions are followed. While this is unusual for a Wholesale Nurseryman to do, we are so confident in the results our Stock will give, (having been grown in our Beaumont Soil, and handled the "Griffing Way"), should any B&B stock that fails to start new growth and our instructions are followed, we will replace the Trees or Shrub at $\frac{1}{2}$ price at our Nursery.

CAUTION: We accept all orders subject to crop conditions and on condition that same be void should injury befall our stock from hail, fire, frost, error in count or other causes beyond our control.

Delivery Costs

TRANSPORTATION: We can deliver to any point in the Gulf Coast territory at l. c. l. freight rates, either by motor freight truck or our own trucks. When we have a truckload of 5,000 or 7,000 lbs. for a certain destination, we can make delivery to your packing house or to your job. Write for our truck delivery prices.

All prices are f. o. b. our Nurseries and shipments travel at the risk and expense of the purchaser. We load trucks and carloads at our Nurseries or Mt. Evergreen, Texas. Express and less carload shipments are made from Beaumont, Texas.

LOW CARLOAD RATES

In Texas we have the lowest freight rates of any state we know. In 30,000 lb. carloads, Balled Trees take the Column 20 Rate, which is 20% of the first class rate. Any Railroad Agent can quote you rates on this basis to any destination from Mt. Evergreen, Texas.

Shipments consigned to destinations outside of Texas, in carload lots take 16,000 lb. minimum, Dormant Nursery Stock Classification, except where Special Rates have been granted.

HOW TO SHIP: We keep abreast with the best facilities for shipping and want to please our Customers for the safest Delivery. We can usually give good advice as to how it is best to ship and will gladly quote Rates, and make suggestions.

SPECIAL FREIGHT RATES: To many cities there are Special Freight Rates on B&B Nursery Stock, in addition to the few mentioned, as follows, applicable from Mt. Evergreen, Texas:

St. Louis, Mo., and intermediate points, including Memphis, Tenn., Kansas City, Mo., Oklahoma City, Okla., Little Rock, Ark., etc., 52¢ per cwt.

Special Rate to New Orleans, La., for 18,000 lb. minimum carloads, 36¢ per cwt.

Shreveport, La.	42¢	San Antonio, Texas . . .	29¢
Harlingen, Texas	36¢	Tyler, Texas	24¢
Corpus Christi, Texas . .	30¢	Houston, Texas	17¢
Dallas, Texas	29¢	Waco, Texas	27¢
Fort Worth, Texas	30¢	Galveston, Texas	16¢
Laredo, Texas	37¢	El Paso, Texas	53¢

(All rates quoted per hundred pounds)

(Special rates effective and best routings will be quoted to your City upon application. Let us serve you!)

OUR SPECIALTY

BROADLEAF EVERGREENS

In the whole southwest, there is no finer collection of Broadleaf Evergreens for general Landscape plantings than found in our Nurseries. We recommend greater use of these choice shrubs for foundation plantings, which range in color and type of growth to include dark green, light green reddened shades, and brightly colored berried species; all of which blend beautifully in the art of Landscaping.

Extra Specimen American Holly

BIG TREES

"Great oaks from little acorns grow" is an old saying and true indeed, but who wants to wait years and years for a tree to get large enough to give desirable shade? Plant some nice Shade Trees NOW and enjoy their comfort this summer!

Big Tree Moving is a newly added department to Griffing service and requiring thorough knowledge and experience, and the most modern equipment. We can move trees up to 10 inches in diameter.

PLANT TREES FULLY GROWN

We find an increasing demand for larger Specimens for use in planting large estates and public grounds. They produce an immediate effect which is desired by most Landscape men and one Specimen Tree or Shrub will take the place of several smaller ones and present a much better appearance.

LARGE SPECIMEN TREES AND SHRUBS

We have quantities of extra large Specimens growing in our Nurseries, which receive special care and attention at all seasons of the year. These plants are larger than listed in the Price List. Prices will be quoted upon request, and we shall be glad to make arrangements for delivery to your planting site. We have special equipment to handle Trees up to 8 to 10 inches in diameter at any season of the year. Write us if you need large Specimen Live Oaks, Pecan Trees, Pin Oaks, Willow Oaks, Camellias, Azaleas, Ligustrums, Junipers, Hollies, Magnolias, Palms, and any other Trees and Shrubs.

NO INDEX

ALPHABETICAL LISTING

COMMON NAMES

All Trees, Shrubs and Vines listed in this catalog are under their common names, according to "Standardized Plant Names."

A. B. C. BY FAMILIES

For your convenience in finding what you want, we are listing all Trees and Shrubs by their common names in Alphabetical Order. We are cross indexing the botanical names and synonyms to assist you in finding what you may be looking for. Botanical names to right of all common names.

A

ABELIA GLOSSY

Attractive Evergreen Shrub.

A. Grandiflora

Approx. Ht.	Class	XX	XXX
15-18 ft.....	B&B	\$.50	\$.60 each
18-24 ft.....	B&B	.60	.75 each
2 - 3 ft.....	B&B	.75	.95 each
4 - 5 ft.....	B&B	1.75	2.50 each

AGARITA

Algerita

Mahonia trifoliata

Leaves similar to Holly. Yellow Flowers and edible berries.

Approx. Ht.	Class	XX	XXX
24-30 in.....	B&B	\$.70	\$.85 each
30-36 in.....	B&B	.90	1.50 each
3 - 4 ft.....	B&B	1.50	2.00 each

AGAVE See Century Plant

ARBORVITAE—Thuja orientalis

There are two types of Arborvitaes, which are known as Occidental and Oriental. The Occidentalis are generally not suited for the Southern States, while the Orientalis or Chinese types all do well in the South. The Oriental type is also classed as "Biotia," which is now unapproved.

BAKER'S PYRAMID

Thuja orientalis bakerii

Tall-growing, columnar habit. Excellent bright green color most of the season; however, frequently becomes slightly brown in winter.

Approx. Ht.	Class	XX	XXX
2 - 3 ft.....	B&B	\$.70	\$.90 each
3 - 4 ft.....	B&B	.90	1.30 each
4 - 5 ft.....	B&B	1.20	1.80 each

BERCKMAN'S GOLDEN

T. or aurea nana

Compact, bushy dwarf habit. Foliage rich yellow—one of the best known Arborvitaes.

Approx. Ht.	Class	XX	XXX
15-18 in.....	B&B	\$.50	\$.75 each
18-24 in.....	B&B	.75	1.00 each
4 - 5 ft.....	B&B	1.15	1.90 each
5 - 6 ft.....	B&B	1.50	2.40 each
7 - 8 ft.....	B&B	3.00	4.50 each

EXCELSIOR

T. or excelsior

Symmetrical. Pyramidal habit, dark green color.

Approx. Ht.	Class	XX	XXX
3 - 4 ft.....	B&B	\$.80	\$1.20 each
4 - 5 ft.....	B&B	1.25	2.00 each

ARBORVITAE—Continued

GOLDSPIRE

T. or. aurea conspicua

True selected type of grafted stock.

Approx. Ht.	Class	XX	XXX	
7 - 8 ft.....	B&B	\$3.50	\$5.00	each
8 - 10 ft.....	B&B	4.50	6.00	each

MAURINE

T. or. maurineana

One of our originations; dark green pyramid.

Approx. Ht.	Class	XX	XXX	
6 - 7 ft.....	B&B	\$1.75	\$2.50	each
7 - 8 ft.....	B&B	2.50	3.25	each

Few of Griffing's Acres

NEW PYRAMID

T. or. pyramidalis

From selected hybrids. We found several Pyramids better than Baker's and other known types. They vary in color and shape, all of good quality and unusual merit.

Approx. Ht.	Class	XX	XXX	
2 - 3 ft.....	B&B	\$.60	\$.75	each
3 - 4 ft.....	B&B	.75	1.00	each
4 - 5 ft.....	B&B	1.00	1.25	each
5 - 6 ft.....	B&B	1.25	2.00	each
6 - 8 ft.....	B&B	1.75	2.50	each

RAMSEY

T. or. cupressifolia fastigiata

Broad at base. Cypress-like foliage. Bluish-green throughout the year. Excellent for accent specimens.

Approx. Ht.	Class	XX	XXX	
3 - 4 ft.....	B&B	\$.50	\$.65	each
4 - 5 ft.....	B&B	.65	.80	each
8 - 10 ft.....	B&B	2.00	2.50	each
10-12 ft.....	B&B	2.50	3.00	each
12-15 ft.....	B&B	3.00	4.00	each

ASH, ARIZONA

Fraxinus velutina

Especially suited for the Gulf Coast. Does not shed leaves in Summer.

Approx. Ht.	Caliper	Class	XX	XXX	
7 - 8 ft.	1¼-1½ in.....	B&B	\$1.00	\$1.50	each
8 - 10 ft.	1½-2 in.....	B&B	1.50	2.00	each

AZALEA

FORMOSA

Azalea indica formosana

We recommend and grow principally the well-known, hardy indica formosa, which thrives well in the open. Requires Leaf Mold or Peat Moss for mulching as the roots grow close to the surface. Lime conditions require prepared soil. There is no more beautiful flowering shrub to be had for the Gulf Coast area.

NO GREATER MASS OF COLOR THAN WHERE AZALEAS ARE USED

DIXIE—Vigorous, free grower. Flowers deep Salmon pink. 18" to 30" only.

BRICK-DUST—Low growing, compact grower with light orange-red flowers. A late bloomer. 15" to 30" only.

ELEGANCE—Hardy, fast growing, open growth with good foliage. Free flowering with medium sized bright pink blooms. 12" to 30" only.

PRESIDENT CLAY—Orange Red with Purple spot at throat. Blooms early. 15" to 30" only.

GEORGE FRANC—One of the earliest bloomers. Hardy with very compact bushy growth. Has very showy Salmon-pink flowers with deep red throat. 12" to 18" only.

PRINCE OF ORANGE—Hardy compact grower of Medium size with Orange-red blooms. 12" to 24" only.

Approx. Spread	Class	XX	XXX	
12-15 in.....	B&B	\$.85	\$1.00	each
15-18 in.....	B&B	1.10	1.60	each

B

BAMBOO

BAMBUSA

Should be planted more, these being varieties of the non-suckering type.

FEATHER

B vulgaris

Strong grower. Light green feathery foliage.

GOLDEN

B. vulgaris aureovariegata

Attractive green foliage—stems a golden yellow.

NINGALA

B. arundinaria falcata

Dwarf habit. Small fern-like foliage.

BAMBOO—Continued

SILVERSTRIPE

B. arundinaria viridistriati

Leaves have a silver or white stripe lengthwise—stems golden yellow.

6 - 9 in.	Clmps.	5 -10 Canes.....	NB.....	\$.30	each

5 - 6 ft.....	B&B	2.90	4.10	each

SEMI-DWARF

Gardenia stricta nana

A dwarf type of upright growing habit. Miniature white flowers in Spring and Summer.

Approx. Spread	Class	XX	XXX	
12-15 in.....	B&B	\$.50	\$.60	each
15-18 in.....	B&B	.60	.80	each
18-24 in.....	B&B	.80	1.00	each
24-30 in.....	B&B	1.00	1.25	each
30-36 in.....	B&B	1.25	1.65	each
36-42 in.....	B&B	1.75	2.50	each

CAMELLIA—Japonica

Camellias are sometimes called the "Aristocrats of Southern Gardens." They are easily grown in the South, and their rich, glossy foliage and colorful flowers make them unusually attractive. There are many named varieties, but not all are desirable. The flowers are produced during the mid-winter when no other flowers are found in the garden, bringing increased admiration for this plant.

BON-AMI—White flowers with red variegations; the petals are loose with stamens interspersed. 15", 18", 2', 2½' only.

BROOKLYANA—Very double, medium flower. DEEP PINK mottled WHITE. 18", 2' only.

CHANDLERI ELEGANS—Flowers are double, very large, and of a cherry-red to rose-pink color, splotted with white. The center petals are interspersed with yellow stamens. 15", 18", 2' only.

LADY ALICE—Dark red flowers, peony type, late bloomer. Very good grower and bloomer. 15", 18", 2' only.

LADY CAMPBELL—Full double, medium size, deep pink flowers. 18", 2', 2½' only.

PURITY—PURE WHITE, perfectly symmetrical in shape. Large and beautiful. 15", 18", 2', 2½', 3', 3½' only.

SARAH FROST—Very double, deep pink. Free flowering. 15", 18", 2', 2½' only.

CAMELLIA—Continued

SOPHIA—Much like Chandleri Elegans. Flower is more cup-shaped and larger. 18", 2', 2½' only.

STAR WHITE—Pure White. Very good bloomer. 18", 2', 2½' only.

CRAPE MYRTLE—Lagerstroemia

We grow most of ours in Balling Soil—it pays to Ball them. Write on order if single stem, many stems from ground or if bushy plants are wanted.

Interplanted with evergreens, beautiful effects are obtained.

Massed in groups of any size, a display of color unrivaled is had the first summer. The most generous usage and the demand of recent years indicates ITS GREAT POPULARITY.

Griffing's Watermelon Red Crape Myrtle

IMPERIAL PINK

Large heads, pastel pink flowers.

L. i. rosea

LAVENDER

A bright shade, very attractive and highly desirable. Large fluffy flower heads.

L. i. lavendula

MAGENTA

A very deep red of outstanding merit.

L. i. magenta

WATERMELON RED

The most desirable of all Crape Myrtles. Produces large, fluffy flower heads of clear, bright rich pink.

L. i. rubra

WEeping

Delicate Pink. Excellent for Banking or under Windows or around ends of Parkways. Measured by spread up to 5 feet.

NOTE: Those listed up to 5 ft. spread close to the ground, where those on stems branched high make an umbrella effect.

L. i. prostrata

7 - 8 ft.....	B&B	4.00	5.00	each
8 - 10ft.....	B&B	5.00	6.00	each

Bushy and standards—

The Favorite Flowering Shrub of the South. A hardy and heavy bloomer, it paints the landscape with its brilliant blossoms in tones of crimson, red, pink, purple and other shades. Frequently termed the "Lilac of the South." Combinations of Crape Myrtle colors make the most exquisite effects obtainable.

Orchid Lavender—Not the ordinary purple

PRUNE EVERY WINTER — For best results Crape Myrtles should be cut back to one foot of the ground when planted. (By using big sizes you get better root systems.) Then every year thereafter prune them back to within 2 to 4 inches where they were the year before. In this way you get much larger flowers, thick branches, and dense foliage.

CORNUS See Dogwood
CORTADERIA See Pampas Grass

CYPRESS—Cypressus

CYPRESS, BHUTAN

Thread-like foliage—weeping effect.

C. torulosa majestica

Approx. Ht.	Class	XX	XXX

4 - 5 ft.....	B&B	.90	1.25	each

E

ELAEAGNUS

This family of popular and hardy Evergreens is one we can safely recommend for Shade locations, fragrant flowers and edible fruit. The three varieties we prefer to grow are Dwarfed habit and grow low and compact.

Elaeagnus is one of the newer Broadleaf Evergreens that has gained popularity in the last few years. It provides a contrast in color of foliage, and grows equally well in Sun or Shade.

ELAEAGNUS FOR SHADY PLACES

DWARF THORNY

E. pungens nana

Live-Oak-Shaped Leaves, silvery underneath.

GRIFFING'S COMPACT

E. pungens compacta

New unusual variety, a sport of Fruitlandi discovered by us in 1934. Preferred to other types of Elaeagnus by many customers and Landscape men because of its close, compact attractive growth.

ROSEDALE

E. pungens rosedale

A new sport. Small leaves, upright grower, many small branches. Where used in shade for Hedges with its new bronze leaves and brownish bark, makes excellent contrast color in plantings.

SIMON

E. pungens simon

Small, dark green leaves dotted with silver scale on upper surface and silvery-white underneath. The upright growth with young foliage adds attractiveness with their fawn colorings.

CUTTING GROWN

Approx. Ht. or Spread	Class	XX	XXX
18-24 in.....	B&B	\$1.00	\$1.25 each
2 - 3 ft.....	B&B	1.25	1.60 each

HALLS, See Vines.

WOODBINE, See Vines.

HOLLY—Ilex

There are many kinds of Hollies, some make Trees, others shrubs—all are valued for their berries. However, all the Trees or Plants do not bear berries. Pistillate ones will bear if Staminate ones are growing close to them.

Three Year Sheared Yaupon Hedge, 12 inches high, 8 inches wide, in foreground.
6 ft. American Holly Hedge in background of this Rose Garden.

6 - 7 ft.....	B&B	1 $\frac{1}{2}$ - 2 in.....	1.20	1.80 each

YAUPON

Ilex vomitoria

This is undoubtedly the best of the native shrubs. It can be kept sheared resembling the fine-leaved Boxwood. Nursery Grown, root pruned, balled from our Beaumont Balling Soil. Compact growth, highly improved over those grown in the woods. We have sheared some into Globes, Cones, Squares, and Pyramids. We also grow blocks for Hedge Purposes and constantly headed back while small, make low compact hedges to start with.

NOTICE: BOTH PISTILLATE (Berry-bearing or Female) AND STAMINATE (Non-Berry-bearing or Male) types. The Pistillate types will bear berries only when properly cross-pollenized by the STAMINATE TYPE. There should be one staminate for every five pistillate.

Cluster of Yaupon Berries with Evergreen Foliage attract attention

YAUPON

NATURAL TYPE

BERRY BEARING—Pistillate—Female

The natural growth types have only had the long side branches sheared when young, causing them to take a center shape with many uniform branches.

NERIUM See Oleanders

OAKS—Quercus

Whether along the AVENUE or BOULEVARD, the highly traveled HIGHWAYS, IN our PARKS and PLAYGROUNDS, on PLANTATIONS, or amidst the surroundings of YOUR OWN HOME GROUNDS; the Oak tree lends forth its welcome arms to SHELTER US from BITING WINDS and the HOT SUMMER SUN. Contrary to many Shade trees, the OAK GROWS in BEAUTY and VALUE WITH AGE. HISTORIC SPECIMEN OAKS are found along the Coast, are RARE in BEAUTY and RICH in GLORY.

Pruning Oaks

Our Oaks are given careful attention, all FORKS BEING CUT out, with the CENTER STEM retained, forcing all branches to come out horizontally from the main trunk. With this training, the center stem continues to grow upward, and the horizontal branches form a beautiful tree.

Always clean, rich green foliage. Very straight bodies. From young seedlings we trim to single stem in center, not allowing forks even on our 20 foot trees. In centuries to come these forked trees may split open and ruin the tree.

As the tree grows older, the side branches predominate, making the tree broader and broader with age, and TRULY MAJESTIC in its beauty. When trees are trained in this way, in case of a storm, there are not a lot of forked branches at the trunk to cause the tree to split and ruin its shape.

WE DO NOT RECOMMEND THE COMMON PRACTICE OF "TOPPING" OAK TREES.

XXX Grades—Defoliate and remove branches under $\frac{1}{4}$ in. size.

XX Grades—Defoliate and prune branches $\frac{1}{2}$ or more.

SPANISH LIVE OAK

We have the complete stock from Acorns gathered in Florida from the choicest isolated grove in existence, so there is not a chance of hybridizing. This true type of fast-growing Oaks are destined to revise the idea that Live Oaks are a slow growing tree, much different from the ordinary native Live Oak in Louisiana and Texas, which we call the Scrub Live Oak, but takes too long to grow.

Nursery grown Live Oak Trees live and thrive under all conditions when the Trees have been root-pruned and properly Balled from the right kind of balling soil and pruned properly before they are dug.

OAK—Continued

PIN OAK

Quercus palustris

Symmetrical tree with large forked leaves fading to scarlet in Fall. This is the true Pin Oak grown throughout the Northern States.

WATER OAK

Quercus nigra

Partly evergreen, upright branches. Leaves 2½ in. wide—narrow at base.

WILLOW OAK

Quercus phellos

Upright uniform, weeping heads. Willow shaped leaves.

PALMS

By selecting hardy varieties which we offer below, they can be planted a hundred miles from the Gulf. They should be planted extensively, as Northern visitors look for the distinctive tropical effect Palms make in our Southland.

BLACKBURN PALMETTO

Palm Sabal Blackburniana

Fan-shaped leaves, brown trunk; hardiest of all Palms, can stand almost zero temperature.

Approx. Ht.	Caliper	Class	XX	XXX	
6 - 7 ft.....	9 -12 in.	B&B	\$3.50	\$5.00	each
7 - 8 ft.....	12-16 in.....	B&B	5.00	7.00	each
8 -10 ft.....	16-24 in.....	B&B	7.00	10.00	each
10-12 ft.....	24-30 in.....	B&B	10.00	14.00	each

The above prices are for Palms with leaves starting out from one to two feet from ground. If a Trunk is desired, add \$1.00 per foot extra. We have them with 4, 5, 6, 7, 8, and 9 foot trunks.

FRUITING DATE

Phoenix dactylifera

Arching Grayish-green leaves. Date Palms will fruit if artificially pollenized.

Approx. Ht.	Caliper	Class	XX	XXX	
4 - 5 ft.....	6 - 8 in.....	B&B	\$3.00	\$4.00	each
5 - 7 ft.....	8 -12 in.....	B&B	4.00	5.00	each
7 - 8 ft.....	12-16 in.....	B&B	5.00	6.50	each

Pindo Palm—Cocos australis

PINDO

Cocos australis

Coconut Palm growth. Edible Fruit similar to Date Palm only smaller. Its long drooping Palm shaped leaves of a blue-green color are very attractive and can be planted very extensively along our Gulf Coast territory as it is very hardy and will stand the ordinary cold weather for 100 or more miles from the Gulf Coast.

Approx. Ht.	Caliper	Class	XX	XXX

PODOCARPUS

Japanese Yew

One of our most attractive trees or shrubs. The fruit is very peculiar, as it has a blue stem with a red ball at the end. Can be planted at the water's edge without injury from salt sprays. One of the most versatile trees grown, for borders and groups, or in individual specimens.

BROADLEAF YEW

Podocarpus macrophylla

Beautiful evergreen, upright branching shrub or small tree. Rather broad leaves, light green when young, dark green when mature.

Specimen Podocarpus in Nursey Field

LITTLELEAF YEW

Podocarpus Microphylla

Similar to macrophylla, except bush is more compact in form, and more slender growth; leaves are more narrow, and are dark green from youth to maturity.

Approx. Ht.	Class	XX	XXX
24-30 in.....	B&B	\$1.00	\$1.50 each
30-36 in.....	B&B	1.50	2.00 each

3 - 4 ft.....	B&B	.75	1.20 each
2 - 3 ft.....	NB	.35	.40 each

PARKINSONIA

RETAMA

Parkinsonia aculeata
Foliage—reed-like branchlets. Tender deciduous ornamental tree with feathery bright green foliage, banks of yellow flowers.

Approx. Ht.	Class	XX	XXX
6 - 8 ft.....	B&B	\$2.00	\$3.00 each
8 -10 ft.....	B&B	3.00	4.00 each
10-12 ft.....	B&B	4.00	6.00 each

PEARS

GARBER—Good quality, ripens in September.

KEIFFER—Large, well known in the South. Hard, but good for preserving.

PINEAPPLE—Excellent for preserving, large and juicy.

Approx. Ht.	Class	XX	XXX
4 - 5 ft.....	NB	\$.55	\$.65 each
5 - 6 ft.....	NB	.70	.85 each
6 - 8 ft.....	NB	1.10	1.25 each

DOUGLAS—NEW PROLIFIC PEAR

A very heavy producer. Fruit is large, slightly oblong in shape, creamy-white with red cheek. Ripens in August.

3 - 5 ft.....	NB	\$.90 each
5 - 7 ft.....	NB	1.50 each

PEAR TREES FOR SKYLINES

Use to line drives and frame the grounds.

PINEAPPLE

Pyrus Species

In addition to its productive ability for fruit, the trees form a tall column, useful for lining drives, and for skyline effects in mass plantings.

6 - 8 ft.....	B&B	\$1.60	\$2.50 each
8 -10 ft.....	B&B	2.80	4.00 each
10-12 ft.....	B&B	4.50	6.00 each

PEACHES

BEST JUNE—Freestone. Light color, red cheek.

CARMEN—Large white flesh with red cheek. Freestone.

ELBERTA—Freestone. Very large, yellow flesh, red cheek.

FRANK—Freestone. Large size, yellow skin with red cheeks; flesh yellow, juicy, and of good flavor. Ripens late in July.

HONEY—Freestone. Creamy-white, tinted with red. Very sweet.

IMPERIAL—Freestone. Large oblong, whitish-yellow, washed-red. Of the Honey family.

PALLAS—Freestone. Deep red; flesh white. Ripens June 20th.

Approx. Ht.	Class	XX	XXX
4 - 5 ft.....	NB	\$.55	\$.65 each
5 - 6 ft.....	NB	.70	.85 each
6 - 8 ft.....	NB	1.10	1.25 each

PHOTINIA

HOLLYLEAF

Photinia dentata

Upright compact growth; large leaves with reddish tint when young and fawn colored stems.

Approx. Ht.	Class	XX	XXX
2 - 3 ft.....	B&B	\$.75	\$1.00 each
3 - 4 ft.....	B&B	1.00	1.50 each
4 - 5 ft.....	B&B	1.50	2.00 each
5 - 6 ft.....	B&B	2.00	3.00 each

PINE—Pinus

ITALIAN STONE

Pinus Pinea

Semi-spreading growth. Deep, rich, green. Young growth resembles Blue Spruce.

JAPANESE RED

Pinus densiflora

A round-headed tree. Needles are bluish-green, 3 to 5 in. long.

Approx. Ht.	Class	XX	XXX
4 - 5 ft.....	B&B	\$1.75	\$2.25 each
5 - 6 ft.....	B&B	2.25	3.00 each
6 - 7 ft.....	B&B	3.35	5.50 each

PRIVET-Ligustrum

This is another large family with various shaped leaves, branches and color, etc. Largely used throughout the South. All varieties have masses of white flowers followed with black berries.

BIGLEAF *L. macrocarpum japonicum*
Leaves dark green, turning to bronze in Autumn.

YELLOWLEAF *L. japonicum aureafolium*
A tall grower with large yellow leaves.

Approx. Ht.	Class	XX	XXX
3 - 4 ft.....	B&B	\$1.00	\$1.50 each
4 - 5 ft.....	B&B	1.50	1.75 each
5 - 6 ft.....	B&B	1.75	2.00 each
6 - 8 ft.....	B&B	2.00	2.25 each

GRACEFUL *L. lucidum gracilis*
Branches gracefully recurved, dark green foliage.

PYRAMID *L. lucidum pyramidalis*
Pyramid form, leaves growing upward on the stem. Tall, narrow, broadleaved Evergreen.

UPRIGHT *L. lucidum erecta*
All branches grow in upright position; resembling Waxleaf.

BLACKLEAF *L. lucidum nigrafolium*
Distinctive Black-green foliage. Most hardy of the Ligustrum group; very thick and glossy shrub.

CRINKLEYLEAF *L. lucidum recurvifolium*
A descriptive name from its twisted or crinkley leaves. Its long arching branches with dark green foliage make it very attractive; much hardier than most of the lucidum types.

Approx. Ht.	Class	XX	XXX
18-24 in.....	B&B	\$.50	\$.60 each
2 - 3 ft.....	B&B	.60	.75 each
3 - 4 ft.....	B&B	.75	1.00 each
4 - 5 ft.....	B&B	1.00	1.25 each
5 - 6 ft.....	B&B	1.25	1.60 each
6 - 7 ft.....	B&B	1.50	2.20 each
7 - 8 ft.....	B&B	2.10	3.00 each

PRIVET—Continued

WAXLEAF, *Griffing's* *L. lucidum compactum*

This is the best bushy, compact evergreen shrub along the Gulf Coast. We have continued propagating from cuttings this variety from the original plants. Its low compact growing type is decidedly different from a lot of Waxleaf.

Approx. Ht.	Class	XX	XXX
15-18 in.....	B&B	\$.50	\$.60 each
18-24 in.....	B&B	.60	.75 each
24-30 in.....	B&B	.75	1.00 each
30-36 in.....	B&B	.90	1.30 each
3 - 4 ft.....	B&B	1.30	1.65 each
4 - 5 ft.....	B&B	1.65	2.00 each
5 - 6 ft.....	B&B	2.00	2.75 each
6 - 7 ft.....	B&B	2.75	3.90 each
7 - 8 ft.....	B&B	3.90	5.90 each
8 -10 ft.....	B&B	5.60	8.00 each

Field of Griffing's Waxleaf Privet

PRIVET—HEDGE

CHINESE *Amur River South* *L. sinensis*

Small light green leaves. Stands shearing into any shape or form.

QUIHOUI *Ligustrum quihoui*

Upright habit, small grayish-green leaves. Blooms throughout the Season; not affected by nematode.

JAPANESE *Ligustrum japonicum*

Large pointed leaves. Sometimes trained to tree forms for shade.

Approx. Ht.	Class	XX	XXX
3 - 4 ft.....	B&B	\$.50	\$.60 each
4 - 5 ft.....	B&B	.60	.75 each
5 - 6 ft.....	B&B	.75	1.00 each
6 - 8 ft.....	B&B	1.00	1.25 each
12-18 in.....	NB	.03	.05 each
18-24 in.....	NB	.06	.09 each
2 - 3 ft.....	NB	.10	.13 each
3 - 4 ft.....	NB	.14	.18 each
4 - 5 ft.....	NB	.16	.22 each
5 - 6 ft.....	NB	.24	.38 each

OTHER HEDGES

Better than Privet: Use Yaupon Holly, Waxleaf Privet, Junipers, Arborvitaes, Bamboo, Elaeagnus, and many other good Evergreens for permanent hedges.

R

REDBUD *Cercis canadensis*

Umbrella-shaped top. The Heart-shape leaves appear after the masses of reddish-purple flowers in the early spring.

Approx. Ht.	Caliper	Class	XX	XXX
5 - 6 ft.....		B&B	\$.75	\$1.10 each
6 - 7 ft.....		B&B	1.10	2.00 each

ROSES—"The Queen of Flowers"

Griffing's Roses are known throughout the Southern States for their High quality and Productiveness. For years we have tested Hundreds of varieties and selected a few BEST ADAPTED for our Southern Climate and soil conditions. Our long experience has shown us that many varieties have their merits. Customers who patronize us are safe-guarded by our years of testing and choosing new Tried varieties. Therefore, we are listing only the Varieties successfully TESTED.

GRIFFING'S ROSES

FOR FIFTY YEARS we have been leaders in growing Roses. In our earlier days we gave attention to quantity production, growing TENS OF THOUSANDS in scores OF VARIETIES; however, in recent years, we have specialized in a LIMITED LIST, including those which average home owners can grow successfully without a great deal of attention. This list includes ONE OR TWO DOZEN VARIETIES, which, according to our experience, are best adapted to ALL CONDITIONS. These will give AMPLE RANGE OF COLOR for selection. The Griffing Roses have been the choice OF THOUSANDS throughout the Southwest.

We realize that most people grow Roses FOR THE FLOWERS ALONE, and we are listing only Roses that bloom MOST OF THE YEAR. Many persons who have had unfortunate experience WITH MILDEW on Roses have been agreeably convinced of the advantage of planting CAREFULLY SELECTED plants which are not subject to MILDEW OR BLIGHT.

SELECTED VARIETIES FOR GULF COAST

AZALEA ROSE—Best for all year blooms. See page 42.

MRS. CHAS. BELL Hybrid Tea

A Shell Pink Radiance, shading to salmon pink as the buds open.

BRIARCLIFF Hybrid Tea

Rich, silvery-pink flowers on long stems. Improvement over Columbia.

BEAUMONT RED—Climbing. See page 42.

CECIL-BRUNNER Polyantha

Sweetheart Rose. Small buds, light pink with yellow shadings. Borne in graceful clusters.

CECIL-BRUNNER, CLIMBING Cl. H. Poly.

Sweetheart Rose or Polyantha type. The rose is same shape as the bush Cecil Brunner, only a much stronger grower and will produce an abundance of Flowers during the summer months.

DAINTY BESS Hybrid Tea

Single broad petal, rose-colored flowers carried in clusters. The blooms are marked by a large flat group of stamens.

ETOILE DE HOLLAND Hybrid Tea

Brilliant red blooms, perfect in half-open buds. Free flowering and fragrant.

FRANCIS SCOTT KEY Hybrid Tea

Very large bright, crimson buds.

GOLDEN SALMON Polyantha

Bright orange-salmon flowers in large clusters. Dwarf type and constantly in flower.

E. G. HILL Hybrid Tea

Beautiful dark red buds; rich fragrance, free bloomer.

LADY HILLINGDON Tea

Deep apricot yellow to orange; long pointed buds; free flowering; spreading growth.

LOUIS PHILIPPE—The Landscape Rose. See page 42.

JONKHEER J. L. MOCK Hybrid Tea

Clear imperial pink. Blooms are of the largest size, highly perfumed. Color between pink and red Radiance.

CL. PAUL'S SCARLET Climber Hybrid Wichuraiana

Bright scarlet blooms of excellent shape and size borne in small clusters.

RADIANCE, PINK Hybrid Tea

Rosy carmine reverse of petals, beautiful silvery tint, large, full, iridescent. Vigorous grower, free bloomer, long stiff stems. This is one of the best we have seen in the South.

RADIANCE, RED Hybrid Tea

Just like the Pink, except in clear red color with no other shadings. Beautiful in bud and flower.

TALISMAN Hybrid Tea

Brilliant, orange red buds mixed yellow, opening to a lighter shade. Beautiful for cut flowers.

TALISMAN, CLIMBING Cl. Hybrid Tea

Like the bush Talisman, in a class by itself. Flowers same as the bush Talisman in shape and color.

K. A. VICTORIA Hybrid Tea

Pure white; splendid large buds, double blossoms making the choicest cut flowers.

K. A. VICTORIA, CLIMBING Cl. Hybrid Tea

Flowers identical with the bush; long stem, an excellent white climber.

ROSES—Continued

AZALEA ROSE

We have been selling a few of this variety to our friends who have admired them, but we never listed them before.

The Azalea Rose is a thrifty growing, healthy Polyantha. In our experimenting with varieties for the Gulf Coast territory, out of hundreds of Polyantha types, this proved to be the best. However, we lost the name and source where we secured the stock.

Flowers much larger than the usual Baby Roses. Clusters large on good strong stems, growing around 2 ft. high. A free and vigorous grower and abundant bloomer. Color, a bright rose pink.

We decided to name this the Azalea Rose, after failing to find its correct name, because of its gorgeous bright color, similar to Azaleas.

One of our choice Landscape Customers noticed a block of these in our Nursery in August and not knowing they were Roses remarked, "What kind of Azaleas is that blooming so gorgeous in the middle of the summer." From this suggestion, we thought best to call it an "Azalea" Rose.

BEAUMONT RED, CLIMBING

For a strong healthy ever-blooming Climber, there is none better as it blooms all the season. We named it after locating its superior quality over any other; it may be some recognized variety for which the name was lost, but on account of a demand for a strong red climber, we have been calling it Beaumont Red.

LOUIS PHILIPPE

This is one of the old Southern Favorites, especially good for Hedges or groups among Landscape Plantings.

The foliage is always bright and green. The bush is a very strong grower of bushy habit and with bright red flowers, hanging in clusters over the bush at all seasons of the year, it is one of the best flowering shrubs that can be planted. We have seen bushes of these 8 to 10 years old, still healthy and growing vigorously, blooming profusely all summer.

HOW TO PLANT

Plant Right AND

Trees Will Grow

HOW TO PLANT B&B TREES: Dig a hole a few inches wider than the ball itself. For heavy or poorly drained land, set the ball with its shoulders level or from one to two inches above the level of the land. For light, sandy soil, the ball should be about two inches below the level of the land. If the dirt in the bottom of the hole is dry, fill the hole with water once or twice and let it soak into the ground. Then set the ball in the hole.

Do not use the loose dirt that is taken from the hole as back-fill. Instead, start spading the outer walls of the hole in toward the ball, about one foot deep. Keep spading around until the ground is broken two or three feet from the ball. Then press firmly toward the ball, using the feet or a heavy "tamp."

Next, hill the dirt up around the stem of the plant four to eight inches high and as far out as the ball reaches. Beginning at the outer edge of the spaded area, using the dirt taken from the hole, make a rim from four to six inches high and from eight to twelve inches wide to form a basin, to hold water, so it will soak down under the ball. Leave the basin for months after planting.

HOW TO PLANT NB TREES: All NB (Bare Root) Trees lose a part of their roots in transplanting. To offset the root loss, the branches should be pruned back half way or more as soon as planted. To plant NB Trees, Roses, etc., a change of color can be seen on the trunks where the surface level should be. Fill in fine soil among the roots, placing the roots carefully in the position they should grow. Then follow the same instructions as for planting B&B Trees.

TO WATER, push the end of the hose down beside the ball and let water run until the basin is full. This will fill the air spaces. Mulch with about a bushel or more of rough stable manure, leaves or lawn clippings.
